

## ELECTRIC VEHICLE (EV) CHARGING STATIONS

The population of people who make up electric vehicle owners is rapidly growing and will continue to increase as electric cars become more and more mainstream. EV Drivers will usually choose their living or visiting destination by whether or not they can easily charge up their car. Positioning your business as a green alternative gives you a strong competitive advantage. We offer a turnkey approach from consulting, planning and procurement to installation and repair.

**BY 2030, 55% OF ALL NEW CAR SALES AND 33% OF THE GLOBAL FLEET WILL BE ELECTRIC VEHICLES.**

### Hardware

- Charging stations
- Electric service upgrades

### Installation

- Cabling & conduit
- Permits
- Signage

### Management

- Driver access
- Billing
- Customer Service

### Maintenance

- Preventative
- Repairs
- Upgrades

## INCENTIVES AVAILABLE

In addition to survey, plan and engineer your site before building your EV Charging Stations, RPAC/Caretech Solutions will identify grants, incentives and tax credits to cover up to 100% of construction costs\* and will connect the stations to our data visualization and management software for compliance with the incentive programs.

New York State has released a new generous electric vehicle incentive program that will cover up to 100% of the costs to purchase and install electric vehicle (EV) charging stations at both privately and publicly accessed locations. Nearly 20 million EVs are expected on US roads in the next decade, making this generous funding critical to ensuring your facility is prepared for this rapid market change.

Reliable Power is an approved contractor that can both secure these incentives and install all needed infrastructure, software, and hardware for your EV charging station. As part of this turnkey installation project, our team will:

- Analyze and Survey your site.
- Arrange financing, permitting and installation.
- Plan for electrical load changes.
- **Create, submit, and manage the applications to ConEdison's EV Make Ready Program NYSEDA's Charge Ready NY Program to secure approval and funding.**
- Provide 24/7/365 Emergency Service.
- Develop Maintenance Programs.
- Support all EV customer billing systems.

Funding for these programs is expected to go quickly so we strongly encourage all interested facilities to participate as soon as possible. For more details about these new incentives or EV charging station installations, contact us by scheduling an appointment [here](#) or **718-338-2129**

## BENEFITS OF INSTALLING EV CHARGING STATIONS

- Increase foot traffic
- Acquire new guests
- Generate income
- Being an industry leader
- Attract green conferences
- Boost guest satisfaction
- Hotel and retail amenities sales increase while non-guest EV drivers fuel-up.

1. Contact Caretech Solutions today to setup a site audit
2. Develop ROI Analysis & Payback including incentives.
3. Develop Action List with RPAC Team
